

# KOHL'S® Guide to Watch Band Sizing

Use this guide to help measure watch band and length sizes for your watch.

**NOTE:** Sizes may vary depending on screen resolution. For accurate sizing please print this page at 100% scale.

## Watch Band Width Chart

Measure your band width by fitting one of the millimeter bars between the lug ends of your watch.

32mm	25mm	19mm	13mm
31mm	24mm	18mm	12mm
30mm	23mm	17mm	11mm
29mm	22mm	16mm	10mm
28mm	21mm	15mm	9mm
27mm	20mm	14mm	8mm
26mm			

## Watch Strap Length Chart

Band size is the combined length of the two straps.

**Standard lengths for women are 165mm-180mm; men are 184mm-197mm.**

To determine the length of your watch band follow these 4 steps.

1. Cut out the length chart below along the dotted lines.
2. Measure your wrist.
3. Measure the case size of the watch. NOTE: see 'Kohl's case sizing guide' if you need help.
4. Subtract your wrist length from step 2 by the case size in step 3 - this will determine your band size.

**PRINTER CHECK:** Measure this box to check accuracy.
